

Raytown C-2 School District, Missouri

Demographic Study and Utilization Forecast Findings

May 2025

Presented by:
Matthew Cropper
Cropper G/S

Principal & Project Manager

Matthew Cropper

- More than 23 years experience providing K-12 consulting services to hundreds of school districts and other clients.
- Manages and Facilitates K-12 redistricting and facility planning projects across the U.S.
- Expert consultant for U.S. Department of Justice, Civil Rights Division
- Published numerous papers about using GIS in master planning and educational planning.

Demographer

Zoran Stojakovic

- Has worked on school planning projects for 100s of districts across the U.S.
- Specializes in demographic analysis and population/enrollment forecasting
- Strong background in technology / GIS and urban/regional planning
- Holds a Master's Degree in Applied Demography from Penn State University

Project Objectives

Cropper GIS Consulting was hired by Raytown C-2 School District to develop a demographic study, a utilization study of the district's current facilities and enrollment, and a utilization forecast based on the findings of the demographic study and the utilization study. All phases of this project have been completed.

Tonight's presentation is intended to:

- Highlight the findings of the Demographic Study
- Review the utilization tables based on current enrollment and building capacity
- Review the utilization forecast for each building based on enrollment trends

Demographic Study

Demographic Study

The population forecasts in the demographic study are developed by using the Cohort-Component Method of population forecasting. Five data sets are required to generate population and enrollment forecasts. These five data sets are:

- a. a base-year population (here, the 2020 Census population for Raytown School District);
- b. a set of age-specific fertility rates for the district to be used over the forecast period;
- c. a set of age-specific survival (mortality) rates for the district;
- d. a set of age-specific migration rates for the district;
- e. the historical enrollment figures by grade.

Demographic Study

The population forecasts in the demographic study are developed by using the Cohort-Component Method of population forecasting. Five data sets are required to generate population and enrollment forecasts. These five data sets are:

1. a base-year population (here, the 2020 Census population for the District and each attendance area);
2. a set of age-specific fertility rates for the district and attendance areas to be used over the forecast period;
3. a set of age-specific survival (mortality) rates for the district and attendance areas;
4. a set of age-specific migration rates for the district and each attendance area;
5. the historical enrollment figures by school by grade.

Assumptions

- a. The national, state or regional economy does not go into deep recession at any time during the 10 years of the forecasts; (Deep recession is defined as four consecutive quarters where the GDP contracts greater than 1% per quarter)
- b. Interest rates have climbed from a historic low in 2020 and will not fluctuate more than one percentage point in the short term; the interest rate for a 30-year fixed home mortgage stays below 8.0%;
- c. The rate of mortgage approval stays at 2015-2020 levels and lenders do not return to “sub-prime” mortgage practices;
- d. There are no additional restrictions placed on home mortgage lenders or additional bankruptcies of major credit providers;
- e. The rate of housing foreclosures does not exceed 125% of the 2015-2020 average of Jackson Counties for any year in the forecasts;
- f. All currently planned, platted, approved, and permitted housing developments are built out and completed by 2034. All housing units constructed are occupied by 2035;
- g. The unemployment rates for Raytown C-2 School District and Kansas City Metropolitan Area will remain below 7.5% for the 10 years of the forecasts;
- h. The intra district student transfer policy remains unchanged over the next 10 years;
- i. The State of Missouri does not change any of its current laws or policies regarding Charter Schools, Vouchers or inter district transfers;

Assumptions

- j. No Charter schools open in the district over the next 10 years;
- k. The rate of students transferring into and out of the Raytown C-2 School District will remain at the 2019-20 to 2024-25 average;
- l. The inflation rate for gasoline will stay below 5% per year for the 10 years of the forecasts;
- m. There will be no building moratorium within the district;
- n. Businesses within the Raytown C-2 School District and the surrounding communities remain viable;
- o. The number of existing home sales in the district that are a result of “distress sales” (homes worth less than the current mortgage value) will not exceed 20% of total homes sales in the district for any given year;
- p. Housing turnover rates (sale of existing homes in the district) will remain at their current levels. The majority of existing home sales are made by homeowners over the age of 55;
- q. Private school and home school attendance rates will remain constant;
- r. The rate of foreclosures for commercial property remains at the 2010-2025 average for Jackson County;
- s. The district will have at least a yearly average of 850 units of single-family and multi-family unit sales.

Population Pyramids

Proof is in the pyramid – Population Pyramids

- Pop pyramids are graphic representations showing age-sex distribution of a geographic
- Can be placed into broad typologies, but no 2 areas have the same exact characteristics.
- Demographic fingerprint.

Green cells (2024-2025 and earlier) are historical data

Blue cells (2025-2026 and later) are forecasted years

Utilization Forecasts

Utilization Forecast

- Utilization forecasts use the historical and forecasted data from the Enrollment Forecasts in the 2025 Demographic Study.
- Depicts utilization as a percentage for each zoned school in the district. Utilization is calculated by dividing the actual or forecasted enrollment of each school by year by the calculated facility capacity.

Questions?

Utilization and Demographic Statistics

Utilization and Demographic Tables

The following tables provide statistics for current schools and boundaries under evaluation. This data is derived from the district's 2024-25 Student Database as of January 30, 2025, and will help inform stakeholders about potential impacts of redistricting adjustments.

Glossary of Terms

Capacity -the number of students that an individual school has the physical capacity to enroll and can be reasonably accommodated in a facility.

Utilization - Utilization is the total enrollment divided by the capacity, described as a percentage.

Live & Attend-In Students - Students residing inside of a school attendance boundary and attending that zoned school.

Live Out, Attend-In Students - Students residing inside of a school attendance boundary, but attending a school outside of the attendance zone they live in.

Out of District students - Students that live outside of the Raytown School District's boundary.

Unmatched students - Students whose address were unable to be located via Geographic Information Systems (GIS).

Utilization and Demographic Tables
