Vendor	IXL	MobyMax	LearnBop	Tenmarks
Date & Time Received	April 2018	December 2017	April 2018	
Cost	$15,066 yearly 7992 yearly-Math only	11,485 yearly $2698- Math Only	9250 Yearly	unavailable to be renewed
Includes	Includes 6th grade SOAR Math and ELA 7th grade ELA 7/8 Math Academy Resource MS math Resource ELA High School	Includes ELA, Math, Science and Social Studies for all students in middle school Resource ELA High School	Math only	Tenmarks is terminating their program
Notes and Teacher Feedback	**Students ranked overall: 1.81 out of 3 Teachers ranked overall: 2.**5 Positive - IXL has an incredible range of skills that can be differentiated for students by grade level. The skills included align well with our ELA curriculum, making it a great way for students to get extra practice opportunities on their level during SOAR. Negative - Teachers cannot "assign" work to students. Rather, they can "recommend" skills. I would prefer to have an "assign" option	**Students ranked overall: 1.71** **Teachers ranked overall: 2.1**3 --I like the RealTime so I can actively see what students are working on. The kids really seem to enjoy it and like that they have to earn points to play the games. It motivates them to work. They also like that they have choices of things to work on. One thing I don't like about it is I can't really see the student's scores. I wish I could see how they are doing on certain topics so I know how to plan even if it was just for a DO NOW. I'd like to be able to use their scores in some way. MobyMax worked well for individual placement skills (ie took a pretest first). However, the teacher side of it was confusing in regards to assigning grade level assignments. Also, they had 2 percentages on the report- correct and focus. I couldn't figure out what the difference was-what the focus represented.	Students ranked overall: 1.25 Teachers ranked overall:
