

Secondary School Monthly Update to Board of Education

May 2018

Southland CAPS

Academic Focus

- Students are continuing their work on their individual passion projects and preparing for the Gallery Walk to showcase their work.
- Students finished internships and returned back to the classroom for individual growth evaluations and end of year reflections. Many students have expressed their gratitude to their internship hosts and the experiences that they have provided.
- Animal Health students helped to create information boards at the Nature Play area of the KC Zoo. Students will get to go see their finished work displayed at the Zoo.

Business/Community Focus

- 85% of our Southland CAPS students had an internship experience for second semester.
- Several of our internships turned into paid positions or were offered a paid position after the experience.
- We are looking for locations for our Education Exploration and our Technology Solutions strands.

Upcoming School Events

- Southland CAPS Awards Night – May 9
- Meet the Teacher – May 10
